PHYSICAL ACTIVITY READINESS QUESTIONNAIRE (PAR-Q)

Facility Consultation appointment scheduled with
 CWC Trainer Appointment Date

Member did not want to schedule anything at this time.

Regular physical activity is fun and healthy, and increasingly more people are starting to become more active every day. Being more active is very safe for most people. However, some people should check with their doctor before they start becoming much more physically active.

If you are planning to become much more physically active than you are now, start by answering the eight questions in the box below. If you are above the age of 15, the PAR-Q will tell if you should check with your doctor before you start. American College of Sports Medicine (ACSM) and National Academy and Sports Medicine (NASM) guidelines require that men over the age of 45 and women over the age of 55 complete a "Medical Authorization Form"

YES	NO	QUESTIONNAIRE
<input type="checkbox"/>	<input type="checkbox"/>	1. Are you a man over the age of 45 or a woman over the age of 55?
<input type="checkbox"/>	<input type="checkbox"/>	2. Has your doctor ever said that you have a heart condition and that you should only do physical activity recommended by a doctor?
<input type="checkbox"/>	<input type="checkbox"/>	3. Do you feel pain in your chest when you do physical activity?
<input type="checkbox"/>	<input type="checkbox"/>	4. In the past month, have you had chest pain when you were not doing physical activity?
<input type="checkbox"/>	<input type="checkbox"/>	5. Do you lose your balance because of dizziness or do you ever lose consciousness?
<input type="checkbox"/>	<input type="checkbox"/>	6. Do you have a bone or joint problem that could be made worse by a change in your physical activity?
<input type="checkbox"/>	<input type="checkbox"/>	7. Is your doctor currently prescribing drugs (For example, water pills) for your blood pressure or heart condition?
<input type="checkbox"/>	<input type="checkbox"/>	8. Do you know of any other reason why you should not do physical activity?

IF YOU ANSWERED YES TO ONE OR MORE QUESTIONS: You should complete a Medical Authorization Form BEFORE you meet with a trainer or become more physically active. Tell your doctor about the PAR-Q and which questions you answered YES.
 NOTE: You may be able to do any activity you want – as long as you start slowly and build up gradually. Or, you may need to restrict your activities to those which are safe for you. Talk with your doctor about the kinds of activities you wish to participate in and follow his/her advice.

NO TO ALL QUESTIONS: If you answered NO honestly to all PAR-Q questions you can be reasonably sure that you can become more physically active and take part in a fitness appraisal/training.

NOTES: If you are or may be pregnant – talk with your doctor before you start becoming more active. If your health changes so that you then answer YES to any of the above questions, tell your fitness or health professional. Ask whether you should change your physical activity plan.

I have read, understood and completed this questionnaire. Any questions I had were answered to my full satisfaction.

CARROLL WELLNESS CENTER

PAR-Q CLARIFICATIONS

For most people, physical activity should not pose any problem or hazard. PAR-Q has been designed to identify the small number of adults for whom physical activity must be inappropriate and those who should have medical advice concerning the type of activity most suitable.

1. Has a doctor ever said that you have a heart condition and that you should only do physical activity recommended by a doctor?

Significance/clarification: Persons with known heart diseases are at increased risk for cardiac complications during exercise. They should consult a physician and undergo exercise testing before starting an exercise program in order to ensure that exercise prescription follows standard guidelines for cardiac patients. NOTE: Medical supervision may be required during exercise training

2. Do you feel pain in your chest when you do physical activity?

Significance/clarification: See question 3.

3. In the past month, have you had chest pain when you were not doing physical activity?

Significance/clarification: A physician should be consulted to identify the cause of the chest pain, whether it occurs at rest or with exertion. If ischemic in origin, the condition should be stabilized before starting an exercise program. Exercise testing should be performed with the patient on his or her usual medication and the exercise prescription formulated in accordance with standard guidelines for cardiac patients.

4. Do you lose your balance because of dizziness or do you ever lose consciousness?

Significance/clarification: A physician should be consulted to establish the cause of these symptoms, which may be related to potentially life-threatening medical conditions. Exercise training should not be undertaken until serious cardiac disorders have been excluded.

5. Do you have bone or joint problems that could be made worse by a change in your physical activity?

Significance/clarification: Existing musculoskeletal disorders may be exacerbated by inappropriate exercise training. Persons with forms of arthritis known to be associated with a systemic component (for example, rheumatoid arthritis) may be at an increased risk for exercise related medical complications. A physician should be consulted to determine whether any special precautions are required during exercise training.

6. Is your doctor currently prescribing drugs (for example, water pills) for your blood pressure or heart condition?

Significance/clarification: See question 1. Medication effects should be considered when formulating the exercise prescription. The exercise prescription should be formulated in accordance with guidelines or the specific cardiovascular disease for which medications are being used. A physician should be consulted to determine whether the condition or factor requires special precautions during exercise training or contraindicates exercise training.)

7. Do you know of any other reasons why you should not do physical activity?

Significance/clarification: The exercise prescription may have to be modified in accordance with the specific reason provided.
